TITLE : BLOOD COLLECTING METHOD

ABSTRACT : PROBLEM TO BE SOLVED: To collect a required amount of blood well enough in a short time from any part of the body even if a stick is shallow and narrow.

SOLUTION: This invention relates to a blood collecting method by sticking the skin of a living body and exuding body fluids therefrom. Firstly, a part on which a blood collecting tool is tightly touched with the skin is made in a sealed condition, and then the pressure in the vicinity of the stuck point is decreased by repeating decompression and release.
